

Department Head  
Mr. Billie Wright  
Physiology

*Billie Wright*

Although only a small percentage of students at McLane are planning a career in science, it is important for everyone to understand and appreciate the role of science in modern life. This is the main goal of our science department. Through the introduction of advanced teaching methods, the capable instructors attempt to keep up with the ever-changing developments in the world of science. Well-equipped biology, chemistry, and physics labs help to promote student interest in scientific exploration.
